

Axis Technical Group Begins Midwest Expansion with Denver Office Opening

New facilities to better service clients in Midwest region with custom development and staffing offerings

DENVER, CO. October 13, 2009 – Axis Technical Group, a technology consulting firm specializing in staffing services and custom software development, today announced the opening of its new office in Denver, Colorado. The new office is the first step of its continued expansion in the Midwest region to provide closer proximity for servicing new and existing clients.

With its headquarters in Anaheim, California and divisions around the world, Axis has built a nationwide roster of clientele on its strengths in custom development and staffing. Development expertise includes legacy migration services, enterprise integration, application development, business intelligence and more. Specifically, Axis leverages its experience in Microsoft technology, including ASP.NET, SharePoint, BizTalk, SQL Server and Performance Point. Axis also provides a comprehensive staffing service to help match highly specialized technical resources with companies seeking specific personnel.

“With a third of our business based in Midwest areas such as Minnesota, Texas and Kansas City, it was only natural for us to want to be closer to our clients,” says Michael Valdes, President and Chief Executive Officer of Axis Technical Group. “There’s no substitute for ‘in-your-face’ customer service which has really helped distinguish ourselves from other consulting firms over the years. We look forward to working with the industrious and innovative companies in the Midwest on solving pressing technical issues that will help them drive their business forward.”

Axis Technical Group offers numerous options for clients on delivery of service:

-Onsite offices in the US, with headquarters in Anaheim, California and offices in San Diego, California and Denver, Colorado.

-Technical development office in Pune, India to provide a lower-cost option while maintaining a high quality of development.

-Technical development office in Monterrey, Mexico for a nearshore option that combines a lower cost structure with the close proximity to the US for easier communication.

“Every company has different budgetary needs and technical requirements, and we strive to have a delivery method that fits their needs,” says Russell Wolf, Vice President of Business Development at Axis. “What gets lost in many project engagements is the human element, and that is where we excel. We build a relationship for life with each

client and gain their trust to be the sole provider of supplemental staffing or development projects.”

Axis Technical’s Denver contact information is as follows:

4610 S. Ulster Street, Suite 150
Denver, CO 80237

Phone: (303) 290-7478

Fax: (303) 379-6919
